

---

Luis Fernando Lago Fernández is Associate Professor at the Computer Science Department of Universidad Autónoma de Madrid (UAM), and member of the Biological Neurocomputation Group (GNB). He has Bachelor's Degrees in Physical Sciences (1998) and Mathematics (2004) from the UAM, and a PhD. in Computer Engineering (2003) from the same university. His research interests include artificial neural networks, data science and machine learning. He is author of 18 international publications indexed in JCR and several contributions to national and international conferences, with more than 800 citations received. His teaching activity at the university began in 2001, and since then he has taught and coordinated theoretical and practical courses at Bachelor's and Master's degree level. Apart from his research and teaching activities, he regularly collaborates with companies in R&D activities related to the field of machine learning and data science.
